OpenInfra & Cloud Native Day Korea 2022

2022. 11. 1 (Tue) Seoul COEX Grandballroom

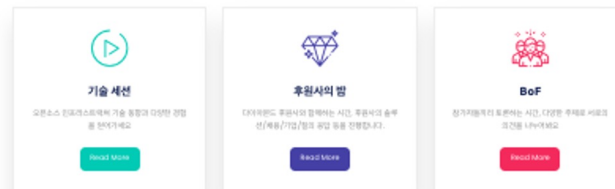

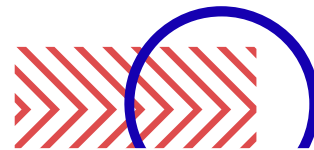

About OpenInfra & Cloud Native Day Korea

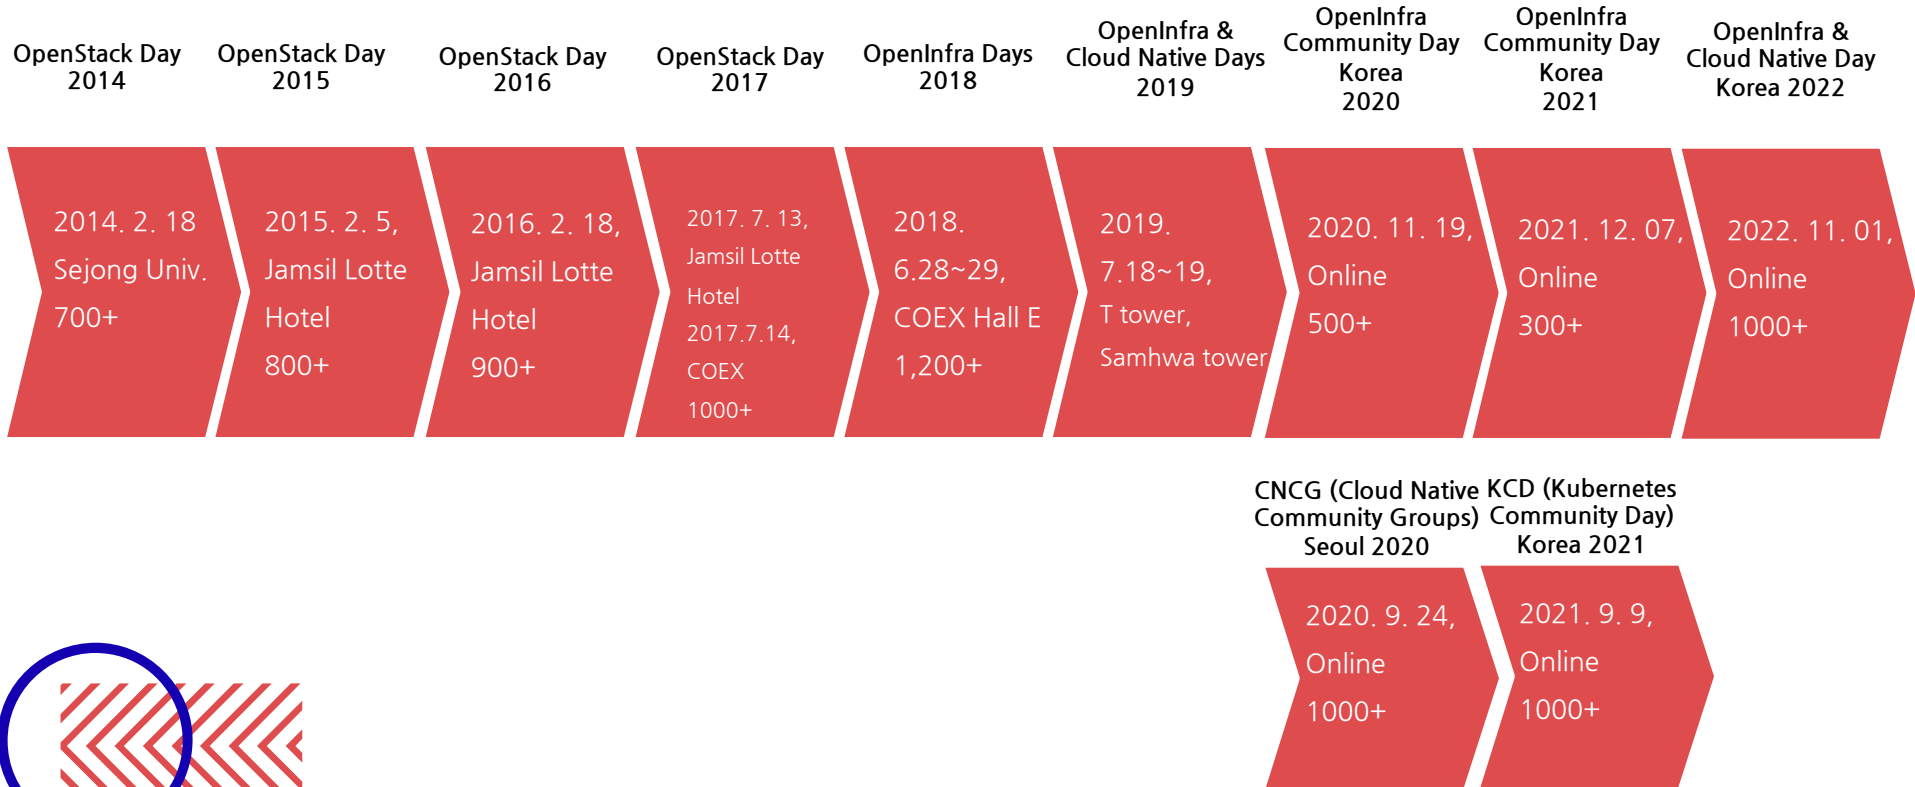

OpenStack Korea Community, Kubernetes Korea Group, Ceph Korea Community, and Open Compute Project Korea Community are co-hosting the event. This is pure community driven collaboration to bring all the related technologies in one place. It will benefit everyone who are working on this highly related area to share valuable information.

We strongly believe that difference in governing body should not be any barrier for users/developers to share their experiences and technical information. We hope this co-event will give a positive influence on how we share our knowledge with others.

As COVID-19 gradually recovers, in 2022, all four communities are contemplating and finally A careful decision has been made to prepare a forum for meeting face-to-face community members. For those who are unable to participate in face-to-face, we are preparing a technical session in a hybrid format that combines both on-site and online, and is preparing so that anyone can enjoy the event comfortably. We hope that you will look forward to the festival of the Open Infrastructure community meeting again in the field, and we hope to interact with more people through the lively cloud community event that gathers in-person.
